

CODEX Multiplex Immunohistochemistry

CODEX (CO-Detection by indEXing) enables researchers to image over 40 proteins markers in tissue at single cell resolution. This webinar will introduce the technology and provide examples of possible applications including a presentation from Dr James Wilmott (University of Sydney) on his use of the method on melanoma tissue.

The CODEX system will be on demo in the Centre for Advanced Histology & Microscopy until the end of the year.

Date: 17th June 2021

Time: 11 – 12pm

Venue: Online via zoom, register [here](#)
