

LIVE WEBINAR

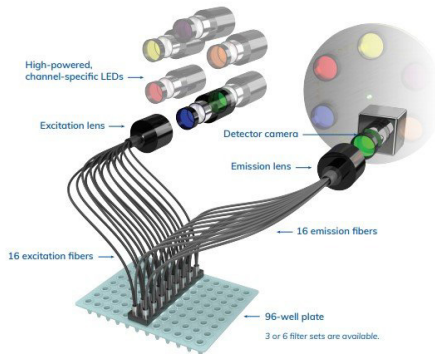

Azure Cielo™ Real-Time PCR system in 2021: Product and Feature Update

August 3, 2021 | Thursday | 2 PM

Azure Cielo™
Real-Time PCR Systems

Designed by scientists, for scientists

Speaker:

Kai Leng Tan, Ph.D

Regional Field Application Scientist (Asia & Oceania), Azure Biosystems USA

Designed to deliver the highest level of performance, Azure Cielo Real-Time PCR brings out the best in your data. It is unparalleled in flexibility, sensitivity, reproducibility, speed, and simplicity. It is also a reliable system packaged with innovative and high-performance optical technology, giving scientists exceptional specificity and precision, and eliminates the need for ROX as normalization control. Most importantly, Azure Cielo gives scientists true 6 multiplexing capability in a single well without any crosstalk. Since 2020, Azure Cielo continues to evolve based on user feedback on a global scale. This webinar will unveil the basic requirements one should look for when purchasing their new qPCR system, introduce Azure Cielo's current update and new features, and demonstrate how the Azure Cielo surpasses expectations with application notes and data.

Join to have **5% OFF** on the **purchase** of the Azure **Cielo system**.

Guests participating in answering questions after the webinar will have the opportunity to receive gifts:

SECOND PRIZE

T-shirt and led light

FIRST PRIZE

Helmet, led light
and 5 96-well plates

THIRD PRIZE

Cups and led lights
