Freshly awarded: Liebherr-Hausgeräte receives the 2023 EcoVadis gold medal

Liebherr-Hausgeräte GmbH has been awarded another EcoVadis gold medal for its responsible practices. Compared to the previous year's result, the company was able to further increase its overall rating. With a total score of 75 points, the manufacturer's production sites are among the top three percent of all companies rated by EcoVadis worldwide.

Ochsenhausen (Germany), 27. November 2023 – For Steffen Nagel, Managing Director Sales & Marketing at Liebherr-Hausgeräte GmbH, this award is both recognition and an incentive: “We are very pleased to confirm that we are making successful progress on our path towards greater sustainability. Our goal is to minimise the environmental impact of our high-quality and long-lasting products throughout their entire life cycle, while simultaneously integrating social and economic aspects. In the future, we would like to continue to improve step by step – because this is the only way to ensure our long-term success.”

Continuous progress pays off – both in the long and short term

Liebherr-Hausgeräte GmbH is aware of its responsibility towards people and the environment and promotes corporate responsibility at its production sites. The spectrum ranges from energy-efficient appliance production to conscientious water management and compliance with labour and human rights along the entire supply chain. This focus on a holistic corporate strategy along the entire product lifecycle has now been rewarded with the EcoVadis gold medal for a second time: the renewed title clearly demonstrates that Liebherr is facing up to the ecological, social and ethical challenges and is continuously developing.

Liebherr-Hausgeräte has been using EcoVadis' evaluation process for several years in order to make its progress in terms of corporate responsibility and sustainability transparent, and it has seen gratifying results: the Austrian Liebherr plant, Liebherr-Hausgeräte Lienz GmbH, has already been awarded the EcoVadis silver certificate twice. Last year (2022), the company celebrated a significant improvement and was awarded the EcoVadis gold medal for all production sites worldwide.

With its EcoVadis gold medal renewed for 2023, Liebherr-Hausgeräte GmbH was able to showcase this strong result and improve the overall rating once again.

EcoVadis – the expert for sustainability rankings

EcoVadis is one of the world's largest and most respected provider of sustainability rankings of companies. In a comprehensive process, EcoVadis evaluates commitment in the areas of environment, ethics, labour and human rights, and sustainable procurement. The evaluations take into account factors such as the sector, size and location of the companies. Over 100,000 companies are currently inspected by EcoVadis. These evaluations are based on international corporate responsibility standards – for example, the Global Reporting Initiative, the United Nations Global Compact and DIN ISO 26000 “Guidance on social responsibility”.

LIEBHERR

About Liebherr-Hausgeräte GmbH

Liebherr-Hausgeräte GmbH is one of eleven divisional controlling companies of the Liebherr Group. The Appliances division employs more than 6,500 staff and develops and produces a wide range of high-quality refrigerators and freezers for the domestic and professional sectors at its headquarters in Ochsenhausen (Germany) and in Lienz (Austria), Marica (Bulgaria), Kluang (Malaysia) and Aurangabad (India).

About the Liebherr Group

The Liebherr Group is a family-run technology company with a broad and diverse range of products. The company is one of the largest manufacturers of construction equipment in the world. However, it also provides high-quality, user-oriented products and services to many other sectors. Today the group comprises over 140 companies from every continent. In 2021, it employed more than 49,000 staff and generated total revenue of over €11.6 billion. Liebherr was founded in 1949 in the southern German town of Kirchdorf an der Iller. Since then, its goal has been to win over its customers with sophisticated solutions and contribute to technological progress.
